
a
O1
O2
Langmuir
MOF-303-like step
Pe ≈ 470
Pe ≈ 94
Pe ≈ 19
probability, best method
(fraction of estimation replicates)
log10 R, R = δ/εeff (dimensionless)
b
0.5 decade
1 decade
O1, step, Pe ≈ 19, ensemble, weak
O1, Langmuir, Pe ≈ 470, best subset, weak
O1, Langmuir, Pe ≈ 94, best subset, weak
O1, Langmuir, Pe ≈ 19, best subset, weak
O1, step, Pe ≈ 470, best subset, weak
O1, step, Pe ≈ 94, best subset, weak
O2, Langmuir, Pe ≈ 470, best subset, weak
O2, Langmuir, Pe ≈ 94, best subset, weak
O2, Langmuir, Pe ≈ 19, best subset, weak
O2, step, Pe ≈ 470, best subset, weak
O2, step, Pe ≈ 94, best subset, weak
O2, step, Pe ≈ 19, best subset, strong
no crossing on the grid
log10 R*, 50 % crossing (dimensionless)
c
spread of log10 R* (decade)
does not collapse
inconclusive
H2a: no verdict (fewer than 2 crossings)
collapses
